

Enterprise Grade File Sync & Share

Your Cloud. Your Data. On Your Terms

SnapSync™ is a **simple, secure** enterprise-grade, file sync and share solution with **unlimited** access to content on any device, from anywhere with centralized IT control.

Get data on the go. Secure access to private confidential data on any mobile device.

Collaborate with confidence. Control who gets access for how long and with whom it can be re-shared.

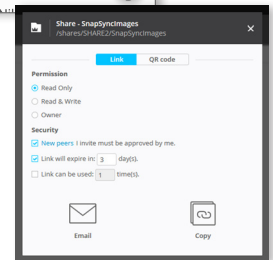

Ensure data availability. Protect against data loss due to failures, lost or stolen devices. Single user, multiple devices.

<p>Available on any device, anywhere</p>	 <p>Build private cloud with on-premise Snap Storage for unlimited data access on any device, anywhere.</p>	 <p>Super fast, real time data updates from the peers closest.</p>	 <p>Simple, intelligent and selective data updates to avoid expensive mobile data usage.</p>
<p>Share your data safely and securely</p>	 <ul style="list-style-type: none"> • Data encrypted during transit and at rest • 3 level access control 	 <ul style="list-style-type: none"> • Owner approval for re-shared folder links • Expiration dates for shared folder links & keys 	 <ul style="list-style-type: none"> • Upgrade or downgrade access control at any time • Disconnect peers • De-link lost devices
<p>Automatic data protection</p>	 <p>Shared data backed up to the enterprise-grade NAS storage on-premise or in private VM in Microsoft Azure Cloud.</p>	 <p>Back-up data from endpoints – desktops, laptops and mobile devices.</p>	 <p>De-link lost devices.</p>

SnapSync

Key Features/Technical Specifications

KEY FEATURES	
Business Continuity	Recover data from Snap storage Recover deleted files Unlink stolen, lost devices to prevent data loss
IT controlled	IT manages access based on business policy enforcement Data stored on IT managed infrastructure and not uploaded on 3rd party clouds
Secure	Encrypted in transit Encrypted while stored (optional) Granular folder level access control
Data Mobility	Secure data access on mobile devices from enterprise NAS storage Backup data generated on mobile devices
Collaboration	Provide controlled access to peers Upgrade, downgrade or revoke access
TECHNICAL SPECIFICATIONS	
Endpoints Supported	OS X 10.8 Mountain Lion or newer Windows 7 or later iOS 6.0 or newer Android 2.2 or newer
Storage Supported	SnapServer SnapCLOUD
Networks Supported	All - WAN, LAN, mobile (3G, 4G, LTE)
Scalability	Unlimited file size Unlimited amount of storage per user
Management Interface	Integrated in Snap Storage GUI
Security	All sync traffic between devices is encrypted with AES 128-bit cypher and a secure key of 20 bytes.
Ease of Sharing	Emails Links QR code
Secure Sharing	Expiration deadlines on shared links Revoke access to future updates Read only or read write access
Access Control	Folder level granularity IT and owner user managed access control Change access permissions at any time Designate other users as owners
Space Saving	Sync files on demand when you need them, so the precious storage on your mobile device is preserved Disconnect folders
Bandwidth Savings	With Selective Sync turned on only placeholder files are in your system which means no constant updates over mobile data network.
Data Protection	File versioning Deleted file archive Second copy on Snap Storage device
